PROFESSIONAL SUMMARY

Economics graduate with hands-on experience in socio-economic assessment on major infrastructure projects, combining quantitative analysis of large datasets with primary evidence gathering and technical reporting for clients. World Bank Group–certified in Environmental and Social Impact Assessment, covering screening, scoping, baseline characterisation and impact significance assessment. MSc from LSE (Merit) with applied econometrics. Available immediately.

PROFESSIONAL EXPERIENCE

Sustainability and Safeguard Compliance Limited (SSCL) — Social and Sustainability Associate | Jan 2026 – May 2026

Independent monitoring on a 584 MW power infrastructure scheme, financed by the AIIB, DEG, the OPEC Fund and Standard Chartered.

- Delivered socio-economic assessment across a major infrastructure project, evaluating livelihood, resettlement and community well-being outcomes against defined assessment criteria
- Designed and delivered primary field surveys, collecting and analysing baseline and monitoring data across affected households
- Analysed socio-economic datasets and translated findings into technical reports for clients, working to fixed reporting deadlines
- Conducted community consultation and stakeholder engagement across field visits, and identified where outcomes departed from assessed commitments
- Co-authored technical monitoring reports submitted to four institutional clients, working within a multidisciplinary team

International Food Policy Research Institute (IFPRI) — Research Intern (Remote) | May 2025 – Aug 2025

- Analysed three rounds of national household panel data (15,000+ observations) using statistical techniques in Stata, applying fixed-effects estimation to isolate programme effects
- Managed end-to-end data preparation: cleaning, variable construction, validation and analysis
- Translated technical results into concise written outputs for non-specialist audiences

Policy Exchange Bangladesh — Research Associate | Nov 2023 – Aug 2024

- Delivered economic and socio-economic research across green growth, trade, investment and education programmes, producing evidence-based reports for clients
- Applied mixed methods — quantitative analysis, literature review and stakeholder interviews — to produce actionable recommendations
- Co-led a multi-partner initiative on women's participation in STEM, coordinating delivery across five partner organisations
- Produced reports and presentations for senior decision-making audiences

BRAC Microfinance — Research Intern, Digital Transformation Unit | Aug 2023 – Nov 2023

- Designed and delivered structured primary fieldwork across 60+ respondents in urban and rural settings, synthesising evidence into recommendations for senior management

EDUCATION

London School of Economics and Political Science (LSE) — MSc Economic Policy for International Development, Merit | 2024 – 2025

Applied econometrics, quantitative impact evaluation, micro- and macroeconomic policy analysis.

Dissertation: empirical panel analysis in Stata across three rounds of household panel data, supervised by Dr Mehrab Bakhtiar (IFPRI).

University of California, Davis — BA Economics, GPA 3.6/4.0 (UK equivalent: high 2:1) | 2020 – 2023

Econometrics; Statistics; Industrial Organization; Public Finance; Energy Economics; Intermediate Micro and Macro Theory. Dean's List.

Support Tutor: selected to coach peers in quantitative economics, calculus and introductory statistics.

Student Event Coordinator, Bangladesh Student Association: planned and delivered 10+ networking events.

CERTIFICATION

Practical ESIA Development in Line with the ESF and National Requirements — World Bank Group and BUET Centre for Environmental and Resource Management | June 2026

Applied coursework across the full impact assessment workflow: screening and risk categorisation; receptor-based scoping and baseline characterisation; impact significance assessment (magnitude against sensitivity); cumulative and ecological impact assessment; the mitigation hierarchy and management plan development; alternatives appraisal; and preparation of a full draft assessment for an infrastructure scheme.

SKILL

Socio-economic and impact assessment: socio-economic assessment | Environmental and Social Impact Assessment (ESIA) | screening and scoping | baseline data collection and characterisation | impact significance assessment | stakeholder and community consultation | technical reporting

Data and analysis: Excel | Stata | statistical analysis of large datasets | econometrics | survey design and primary evidence gathering | data cleaning and validation

Reporting: PowerPoint | Word | technical reports and presentations for client and non-specialist audiences

Languages: English (fluent) | Bengali (native) | Hindi (fluent) | Urdu (conversational)
